

## How to purchase?

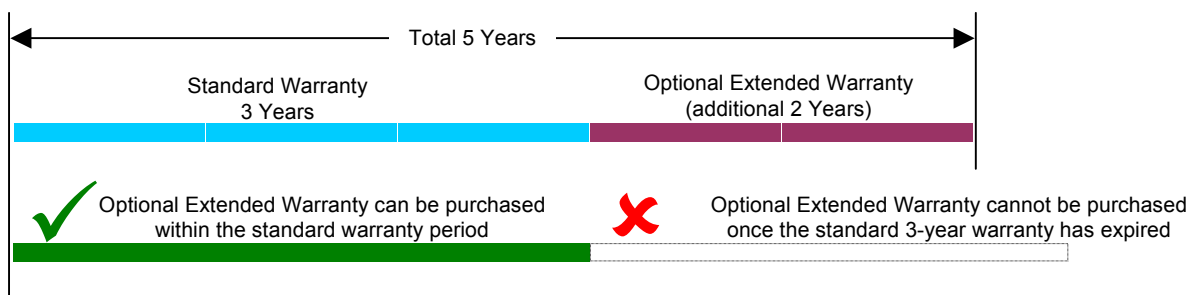

The “Extended Warranty Registration Certificate” is proof that one specific unit of Infotrend product has been registered and is eligible for the extended warranty. It does not mean that Infotrend will handle the repair directly with the end user.

Infotrend provides in-warranty repairs to its direct customers.

In the example above, the “Distributor” is the direct customer of Infotrend. Infotrend provides the in-warranty repair to the “Distributor”. The “Distributor” provides the in-warranty repair service to its customer, the “Reseller”. The “Reseller” provides the in-warranty service to its customer, the “End User”.

## The Warranty Period?

Original Product  
Invoice Date  
from Infotrend

The optional extended warranty can be purchased on selected models only. Please check the web site link in the FAQ for the list of models.
