

## The Museum of the History of Polish Jews Adopted Infortrend Storage Solutions for Its Hyper-V Environment

### Organization

The Museum of the History of Polish Jews in Warsaw

### Challenges

Large amount of data needs to be stored

- Replace out-of-date storage systems
- Easy storage expansion to meet growing demands
- Support Hyper-V virtual environment

### Solutions

Infortrend storage systems "EonStor DS 3060"

- High capacity and scalability 60-bay storage system, up to 360 drives for one system with the expansion enclosures
- Hyper-V support
- Dual controller and redundant components for high availability

*"Our challenge was to find an inexpensive solution that can be incorporated into our existing infrastructure and easily expanded to suit our still growing demands. With its good performance, great expandability and low TCO, Infortrend turned out to be the perfect solution for our organization." – Tomasz Sperczak, Head of IT Department*

The Museum of the History of Polish Jews opened its doors to the public in April 2013. It currently functions as a cultural and educational centre with a rich cultural program, including temporary exhibitions, films, debates, workshops, performances, concerts, lectures and much more. The Core Exhibition, presenting the thousand-year history of Polish Jews, opened on October 28, 2014. The Museum was troubled by its outdated storage systems and was looking for a solution to meet these requirements for backup and archiving:

1. Seamless incorporation into existing infrastructure
2. Support for physical and Hyper-V virtual backup for multi-applications
3. Easy storage expansion to meet growing demands

### The High Capacity of Infortrend Storage Solutions

To resolve these issues, the Museum considered almost all major vendors on the market and after careful evaluation chose the Infortrend storage system "EonStor DS 3060" due to its good performance, high availability, and large scalability of up to 360 drives for one system via expansion enclosures.

### Hyper-V Support and Easy Configuration

As data is very valuable for the Museum, it is critical for their storage to support backup mechanisms. Infortrend's solution fully supports both physical and Hyper-V virtual backup to ensure the Museum's data is safe. Furthermore, the Infortrend EonStor DS 3060 dual controller storage system offers large capacity and extreme reliability, while also providing convenient deployment and user-friendly management.

*"We have a complex IT infrastructure so it took us a week or so, plus longer time for migration process. But from the moment we had everything prepared and finished the configuration in our existing infrastructure, it was just few hours to integrate Infortrend storage solution into our system." – Tomasz Sperczak, Head of IT Department*
